

JIRA

JIRA Software is a default choice for most companies. Initially, it was built for the issue and bug tracking, but can be made for software product development. JIRA software capabilities are endless that's why it is the most popular agile tool for software teams.

These are Agile features in JIRA:

1. Issue: user stories and bugs
2. Boards
3. Workflows
4. Backlogs
5. Roadmap
6. Different types of reports' charts

Price: Free to \$14 per user per month

Trello

Trello is popular for Agile teams. You should try it. Trello is completely focused on the Kanban framework, and it's easy to get started. In all boards there are different lists and cards represent a task. They are in columns, so if progress is made then you move a card from one column to another in right.

Trello is an ideal option for small teams, which don't require tracking of tasks with more than the Kanban board. It's a very simple view of task tracking.

These are Agile features in Trello:

1. Boards
2. Labels
3. Custom Fields

Price: Free to \$20.83 per user per month
